

# Math Counts!!

- Math competition for grades 6-8
- Individual and Team competitions
- Scholarship money available at the State and National Levels
- Math Club for all grades

## Math Counts Competition

- The Math Counts competition is organized into 4 levels: school, chapter, state and national.
- Students in grades 6-8 can compete
- The competition is divided up into 5 rounds, each of which involves answering questions using various problem solving strategies and a lot of ingenuity
- Scores are based on having the right solution and being able to defend the arrived at solution
- Fee of \$20 for each individual and \$80 for a team of 4 students (may be paid by the school)
- Provides a time for students to collaborate together to solve interesting problems and to strengthen their problem solving and mathematics skills along with the excitement of a competition

## Math Club

- The Math Club is organized into 3 levels: Bronze, Silver and Gold
- A monthly challenge, containing questions much like those used in the competition, is sent out to participating schools. To achieve higher levels in the club, participants need to complete 5 out of 6 of these challenges as well as score well on the Ultimate Math Challenge
- No fee required
- Provides a time for students to collaborate together to solve interesting problems without the pressure of the competition
